Boston, MA | (857) 867-6795 | bhawinis08@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

Northeastern University | Boston, MA, USA

Master of Science, Quantitative Finance | GPA: 3.67/4.00 | Sep 2025 - Dec 2026

- **Relevant Coursework:** Investment Analysis, Financial Modeling, Derivatives, Quantitative Portfolio Management, Financial Econometrics

CHRIST University | Bengaluru, KA, India

Bachelor of Science, Economics & Mathematics | GPA: 3.44/4.00 | Aug 2022 - May 2025

- **Relevant Coursework:** Econometrics, Probability, Statistics, Linear Algebra, Optimization

EXPERIENCE

360 Huntington Fund | Equity Research Analyst

Boston, MA, USA | Sep 2025 - Aug 2026

- Conducted bottom-up equity research for an approximately \$2M student-managed portfolio, analyzing financial statements, industry dynamics, competitive positioning, earnings drivers, and company-specific catalysts.
- Built DCF and relative valuation models incorporating scenario analysis, sensitivity testing, downside risks, and catalysts to evaluate risk-reward and develop investment recommendations.
- Presented a Keurig Dr Pepper investment thesis to the investment committee with a **\$44 price target and approximately 65% upside at initiation**; recommendation was approved and added to the portfolio.
- Monitored holdings, earnings developments, valuation changes, and thesis drivers to reassess investment conviction and portfolio risk.

Valmar Capital | Junior Research Analyst Intern

USA | Jul 2026 - Aug 2026

- Developed an automated Python portfolio analytics framework for a multi-manager digital-asset portfolio, translating manual Excel reporting into structured workflows for **NAV, returns, exposures, and performance analysis**.
- Reconstructed and validated underlying fund valuations, return histories, share classes, costs, and portfolio exposures against existing models to improve analytical consistency across estimated and final NAV reporting.
- Built dynamic manager, strategy, fund, and portfolio-level exposure analysis alongside performance analytics across multiple investment strategies and market environments.
- Developed an interactive **Streamlit investment analytics dashboard** integrating return streams, cumulative performance, strategy-level analytics, exposures, and market-regime indicators for ongoing portfolio monitoring.

MIT Sloan Boston Alumni Association | Finance Intern

Boston, MA, USA | May 2026 - Jun 2026

- Analyzed multi-year revenue, expenses, budgets, cash holdings, and operating trends to evaluate resource allocation and financial performance.
- Developed executive reporting and visualization tools to translate financial data and cash-flow relationships into decision-ready insights for senior stakeholders.
- Evaluated alternatives for excess cash allocation across liquidity, risk, and return considerations and presented analysis for capital-allocation discussion.

Venture Catalysts | Portfolio Management Intern

Mumbai, MH, India | Jun 2025 - Aug 2025

- Evaluated portfolio-company performance across operating KPIs, valuation drivers, capital requirements, and downside scenarios to support ongoing investment monitoring.
- Conducted financial and investment analysis supporting **more than \$5M of investment diligence**, assessing company fundamentals, market positioning, growth drivers, and investment risks.
- Developed structured analytical workflows to consolidate company-level information and improve portfolio monitoring and investment review.

SELECTED QUANTITATIVE PROJECTS

Transaction Cost Analysis & Almgren-Chriss Execution Model | Python

- Implemented the **Almgren-Chriss optimal execution framework** to model the trade-off between market impact and price risk across alternative liquidation schedules.
- Analyzed execution costs under varying volatility, liquidity, risk-aversion, and order-size assumptions and compared optimized trajectories with benchmark execution strategies.

Fama-French Factor Research Pipeline | Python

- Built a reproducible empirical asset-pricing pipeline to estimate **factor exposures, abnormal returns, and statistical significance** using Fama-French models.
- Applied time-series regression and diagnostic analysis to evaluate the persistence and explanatory power of systematic return drivers.

Options Pricing, Greeks & Trading Simulation | Python

- Developed an options analytics framework implementing **Black-Scholes pricing and Greeks** across changing underlying prices, volatility, maturity, and strike assumptions.
- Extended the framework into trading simulation to evaluate option positions and changing **Delta, Gamma, Vega, and Theta** exposures under alternative market scenarios.

TECHNICAL SKILLS

Programming & Analytics: Python (Pandas, NumPy, SciPy, scikit-learn), SQL, R, Streamlit, Excel, Power BI

Quantitative Methods: Econometrics, Time Series Analysis, Factor Modeling, Portfolio Optimization, Backtesting, Monte Carlo Simulation, Statistical Analysis

Investment & Portfolio: Equity Research, Financial Modeling, DCF & Relative Valuation, Portfolio Construction, Performance Attribution, Risk Analysis, Asset Allocation, NAV Analysis
